In Memory of Dr. Baqie Mohammad
January 1, 1947 - November 29, 2012

Baqie Mohammad, a long-time resident of IU Apartment Housing, passed away last December at the IU Simon Cancer Center in Indianapolis. Her life as a student, mother, and academic can serve as an example that, despite obstacles, one can reach many achievements.

Nasrin Hekmat-Farrokh, a friend of Baqie put it poignantly:

I heard the terrible news about the death of this exceptional woman. It is difficult to describe the deep sadness of losing a colleague and friend, and the effect that this can have on each of our individual emotional world. I respected and admired Dr. Baqie Muhammad, a woman who, in spite of having family obligations and raising two daughters, worked tirelessly for many years in pursuit of knowledge at Indiana University. In fact, she was in the process of finishing her third Ph.D. Even though Baqie was not physically well, she was deeply engaged in campus life and was an active member of the Apartment and Family Student Council (AFSC). Over the years, she held several executive roles, most recently that of Secretary. She dedicated many hours to student programming and to encouraging residents to become involved in our community.

It is my hope that the life of a woman such as Baqie will inspire women everywhere, especially those who are deprived of the rights of education and personal freedoms, to pursue those rights and freedoms and thrive in doing so, and to give of their time and talents to the well-being of their communities.

In memory of Dr. Muhammad, the Apt. Housing Administration, in conjunction with the AFSC, will establish an Apartment Housing Good Citizenship Award named after her. Further details about the award will be forthcoming. Questions? Call 855-2679.

TORNADO INFORMATION

In Indiana, tornadoes—dangerous whirlwinds—can happen any time of the year, but they occur most frequently in the spring. Local radio and TV stations broadcast weather advisories if severe weather approaches this area. The term “tornado watch” means that a tornado could develop; however, a “tornado warning” indicates that a tornado is detected and that you should seek shelter at once. Sirens are turned on your radio or television to a local station for further information. TV stations broadcast weather advisories frequently in the spring.
